Webster the Webcam is Now Live!

After an overnight rain, have you ever wondered whether the courts were dry enough to play in the morning? Or what the wind conditions were, the crowd size, or whether the courts were even open at all? We now have a solution!

Announcing the arrival of Webster the Webcam, mounted just above courts 4 and 7. Webster will broadcast a live video stream of our courts that can be accessed from our Tustin Pickleball website on any device (phone, tablet, PC, or MAC).

Webster consists of a solar powered IP camera, a cellular SIM card router, and a lithium-ion battery. The solar panel can store enough energy to run Webster for up to 5 days on battery power alone. To limit data charges, and avoid privacy concerns with TUSD, Webster will be available only between the hours of 6am to 12pm PST on our regular days of organized play (Monday through Saturday).

To access Webster, go to the homepage on our website at tustinpickleball.org, and click on the Webster button icon. You can also access Webster by clicking on the "Webcam" link located on the main menu.

So, starting tomorrow morning, you'll be able to assess playing conditions before making that trip over to the courts. We hope you find Webster the Webcam to be a valuable addition to the Tustin Pickleball family!
