

## When Does Rotation Change from 2 on/off to 3 or 4 on/off?

To balance wait times across all courts of the same level, player rotation is based on the number of paddles waiting on each court in the row. Rotation begins with 2 on 2 off, and winners can stay and win 2 consecutive games before rotating off. **As soon as 3 or more paddles are waiting on each court in the row, the rotation changes to 3 or 4 on, 3 or 4 off.** Below is an example scenario for courts 4, 5, and 6 which are in the Intermediate skill level row.

In this scenario, it is still 2 on, 2 off because 2 players from court 6 could move to court 5, and 1 player could move to court 4 to balance out the wait times across all Intermediate courts.

When 3 or more players are waiting on each of the Intermediate courts, rotation becomes 3 or 4 on/off for all of the Intermediate courts. The same rule applies to courts 1, 2, and 3 (Novice/Intermediate courts), courts 7 and 8 (Adv Intermediate/Advanced courts), and court 9 (Advanced/Expert court).
